

Artworks for Spa Areas

JW Marriott Hotel İstanbul Marmara Sea Spa/ Artwork Design and Applications: Alan Project

*“Art washes from
the soul the dust
of everyday life.”*

–Pablo Picasso

Hotel spa areas have become not only places of rest and care, but also part of the aesthetic experience. In these spaces, where guests are welcomed with tranquility, serenity, and elegance, artworks deepen the spatial atmosphere and create an experience that appeals to the senses.

The simple and balanced aesthetics of Zen culture is one of the art forms most in harmony with the spirit of spa spaces. Minimal sculptures made of natural stone blend with the serenity of the environment, offering the user a sense of peace and meditation.

"Art is a form of meditation, a way to quiet the noise and chaos of the world and find inner peace."

-Berthe Morisot

Wall reliefs, frequently used in spa lounges, add both a rich texture and a new dimension to the space through light and shadow play. Organic forms and nature-inspired motifs enrich the visitors' sensory perception.

The encounter of sculptures and reliefs with the element of water enhances the spa experience even further. Reflection, the movement of light, and the sound of water transform the artwork into a living form, allowing a different atmosphere to be felt with every glance.

“To the mind that is still, the whole universe surrenders.”

-Lao Tzu

*"Creativity
requires stillness;
it only flourishes
in the silence of
thought."*

-Henri Matisse
